Mr. Dave Gardner, President
Citizen-Powered Media
760 Wycliffe Drive
Colorado Springs CO 80906

Dear Dave:

We want you to know how we were affected by your 20-minute promotional DVD for "Hooked On Growth." I told my wife it was so powerful it felt like a virtual punch in the stomach. If the ultimate documentary packs the same punch, you should have lots of intensely involved viewers.

We were so impressed by your DVD that I immediately mailed our copy to Diana Hull, President of Californians for Population Stabilization, and wrote a commending letter to John Rohe, Vice President-Philanthropy of Colcom Foundation. Both of these organizations have a deep commitment to educating the American public about the detrimental effects of perpetual and accelerating population growth in the United States. It seems reasonable to me that they each will take an interest in your project and offer support where practicable.

Likewise, I would like to offer my support in whatever ways you might find useful. Please feel free to call on me anytime you think I might be helpful. I can't think of anything more valuable than having a documentary film available (a) which helps people understand where America's population is headed, (b) which encourages people to take action to reverse America's ad hoc population growth policy, and (c) which provides people with tools to take action.

Again, thank you for allowing us to view your promotional DVD and for all the effort you have put into the "Hooked On Growth" project. We wish you all the best in this endeavor.

Cordially,

Edward C. and Marolyn Hartman
